

# You said... We did...

Thank you for sharing your views on the Chemistry Library's space and services. Here are some improvements we have made, and are planning to make, in response to your comments on the feedback boards.

**You said... More "docking solutions" / monitors.**

**We did...** Two more monitors with HDMI cables installed, taking the total number of docking solutions available in the library to six.

**You said... Private spaces and space dividers.**

**We did...** Reconfiguring the library space is a long-term project we are researching and hope to make some initial changes over the Summer vac. We are also looking into purchasing some desktop dividers over the Summer vac.

**You said... More beanbags please.**

**We did...** Two more beanbags purchased, the library now has four.

**You said... A place to leave, anonymous, comments about the department at large.**

**We did...** This will be raised with members of the Library and Scholarly Communications Committee, but is not within the control of the library.

**You said... Many plug sockets don't have power.**

**We did...** A check of all plug sockets, signage to alert users where desks had no power, and a report logged with maintenance. This is being investigated but is a larger, more complicated, issue that first thought. Maintenance work is on-going.

**You said... More comfy chairs.**

**We did...** We are looking into options, and costs, and hope to make improvements over the Summer.

**You said... It's cold! Better temperature regulation.**

**We did...** We provided further information on heating which noted it is University Estates Division policy that buildings will only be heated between October and March, meaning that the heating is switched off on 31st March. We have been monitoring the temperature and the library has always been above 18 degrees, though we appreciate it can feel cooler when you are sat studying. We provide plug-in radiators and blankets, and advise wearing layers.
